# Windham High School: 2017 NH YRBS Preliminary Report

Tobacco Use - Behaviors: Time Trends, By Sex, and By Grade

Windham High School is in the Greater Derry Public Health Region and is served by the Bridges crisis center.

# PRELIMINARY RESULTS (v1.2)

This report contains preliminary results for 2017. All 2017 results are subject to change when the CDC returns the final dataset to the State, expected in early 2018. Please use caution when referring to and using these preliminary data until the final data set is received from the CDC. This report contains results for all questions asked on any YRBS survey since 2007. Note, access to regional level results were first made available in 2015 and are not available prior to that year.

#### State and Regional Estimates

State and Regional estimates are calculated from a random sample developed using scientific survey methods. These methods ensure the respondents are representative of students in the region in the State. These estimates account for student, classroom, school, and regional factors. The random sample is not designed to provide school level estimates.

#### School Level Estimates

The 2017 survey response rate at Windham High School was 87% where 786 of 901 students took the survey. School level estimates are unweighted and based on a convenience sample of students in attendance, and not opting out of participation in the YRBS, on a given date and time during the school year. However, because participation was relatively high the school estimates may still be representative of the entire school population. Results could be less representative if specific classrooms or classroom types were not included in the survey. We have attempted to estimate how many students in the school actually fall within each risk category. We did this by scaling up the students responding in the survey using school enrollment data.

Estimates number and percentage were suppressed (\*) if the underlying sample size was <60 respondents and/or cell sizes are between 1 and 5.

#### Help and assistance

#### Questions on this report (NH YRBS Community level preliminary report)

Health Statistics and Data Management Division of Public Health Services - State of NH NH.YouthRiskBehaviorSurvey@dhhs.nh.gov; (603) 271-4988;

#### Additional technical assistance for YRBS related information

#### Change Log

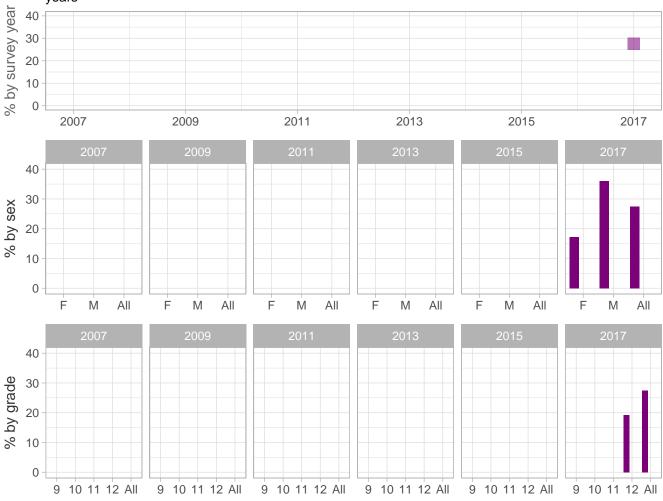

**v1.2**: Indicators revised to display by CDC question direction as greater risk; and, revised methodology to more accurately display number of students projected based on school enrollment data.

v1.1: School estimates corrected to include CDC sample - report sent 8/31-9/1

v1.0: Initial report sent 8/29

Percent of students who smoked cigarette even one or two puffs (for the first time) before age 13 years

School-level by Sex and Grade
